

## Key Performance Indicators for arc.gold.vw\_fact\_orders

Based on the analysis of your orders data, here are the most important KPIs you should track and why they matter:

### 1. Total Revenue: 119.9B INR

Your business has generated **119.9 billion in total revenue** across 39 million units sold from January 2024 through December 2025. This is your primary business health indicator.

**Why it matters:** Revenue is the fundamental measure of business performance and directly impacts profitability, growth potential, and market valuation.

### 2. Revenue Growth Rate: 142% YoY

Revenue grew from **35.1B in 2024 to 84.9B in 2025**, representing a remarkable **142% year-over-year growth**.

**Why it matters:** This explosive growth indicates strong market demand, successful expansion, and effective business strategies. It's a critical metric for investors and strategic planning.

### 3. Customer Base Expansion: 54 Active Customers (200% growth)

Your active customer base expanded from **18 customers in 2024 to 54 in 2025**, a **200% increase**.

**Why it matters:** Customer acquisition drives revenue growth and reduces concentration risk. The 3x customer growth alongside 2.4x revenue growth shows healthy customer diversification.

### 4. Product Portfolio: 406 Products Across 30 Divisions

You manage **406 distinct products** spanning **30 sports and nutrition divisions**.

**Why it matters:** Product diversity reduces dependency on single categories and allows you to capture multiple market segments.

## 5. Division Performance: Cricket (31.8%) and Football (20.5%) Lead

**Cricket** generates **38.2B (31.8% of revenue)** and **Football** contributes **24.6B (20.5%)**. Together, these two divisions account for over half of total revenue.

**Why it matters:** Understanding your revenue concentration helps prioritize inventory, marketing spend, and product development. The top 2 divisions drive 52% of revenue, indicating both strength and concentration risk.

## 6. Channel Mix: Retailer Channel Dominates (78.4%)

The **Retailer channel** generates **93.9B (78.4% of revenue)**, while **Direct** contributes **24.5B (20.5%)** and **Acquisition** adds **1.4B (1.2%)**.

**Why it matters:** Channel distribution reveals your go-to-market strategy effectiveness and dependency. The heavy reliance on retailers (78%) suggests strong B2B relationships but also highlights an opportunity to grow direct-to-consumer sales for higher margins.

## 7. Average Unit Price: 4,052 INR

Your average product price point is **4,052 INR**, indicating a mid-to-premium positioning.

**Why it matters:** Price positioning affects margin potential, target customer segments, and competitive positioning.

## 8. Top Customer Concentration: FitnessWorld (9.4%)

Your largest customer, **FitnessWorld**, generates **11.3B (9.4% of total revenue)**. The top 10 customers collectively contribute significant volume.

**Why it matters:** Customer concentration risk is manageable with your largest customer at under 10%, but monitoring top customer health is critical for revenue stability.

## Summary

Focus on these KPIs in your regular reporting:

- **Revenue growth rate** (track monthly/quarterly trends)
- **Customer acquisition and retention** (54 active customers)
- **Division performance** (especially Cricket and Football)
- **Channel effectiveness** (optimize the 78% retailer vs 20% direct mix)
- **Average order value and unit economics** (4,052 average price)
